Comments: Our operations, in normal condition, permits us to remain as a Small Quantity Generator. However, on one occasion we exceeded the limit of hazardous waste shipped. Future operation and handling will not exceed established limits nor will we become a storage facility that would exceed the limits of a Small Quantity Generator. Our present cleaning operation is limited to use of caustic soda for hazardous materials content. Other cleaning compounds are non-hazardous and not regulated.

(Describe reason(s) for claiming non-regulated status, exemption being claimed, quantities, names and disposition of waste, etc.)

Include copies of any supportive documents (i.e., waste analysis, notifications, manifest copies).

Therefore, please (circle one) withdraw or amend the status of the notification form(s) to reflect the current status above.

Dear Mr. Kelly:

The subject hazardous waste management facility was inspected by a representative of this Agency on April 19, 1988. The inspection revealed that the closure activity was completed in accordance with the approved closure plan dated March 27, 1987.

Certification that the five (5) hazardous waste container storage areas (S01) had been closed in accordance with the approved closure plan by the owner/operator, Paul F. Deady, and an independent registered professional engineer, Michael C. Houston, P.E., of Illinois was received at this Agency March 10, 1988.

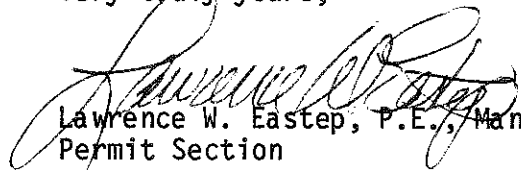

The Agency has determined that the closure of the Chrome Locomotive container storage (S01) areas has apparently met the requirements of Interim Status Standards, 35 Ill. Admin. Code, Part 725 (40 CFR, Part 265). This facility must continue to meet the applicable requirements of 35 IAC Part 722 - Standards Applicable to Generators of Hazardous Waste and Part 723 - Standards Applicable to Transporters of Hazardous Waste.

Re: Closure Plan Review

Facility Name: CHROME LOCOMOTIVE, INC.

USEPA ID #: 109287920

OCT 6 1986

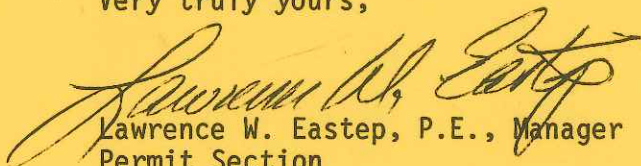

As you are aware, we are currently evaluating the request for closure of your facility as referenced above, and which is regulated under the Resource Conservation and Recovery Act (RCRA).

On November 8, 1984, the Hazardous and Solid Waste Amendments of 1984 (the Amendments) were enacted to amend RCRA. Under Section 206 and Section 233 (copies enclosed) of the Amendments, all facilities "seeking a permit" (taken to mean interim status facilities) must provide for corrective action for all releases of hazardous waste or constituents from any solid waste management unit, regardless of the time at which waste was placed in the Unit. Please note that both hazardous and non-hazardous wastes can meet the definition of solid waste under 40 CFR 261.2.

Consequently, we must determine whether such releases have ever occurred at the facility site. If they have, we must ensure that any necessary corrective actions either have been taken, or will be taken, pursuant to a decision on your closure plan. An important part of our determination includes your willingness (or unwillingness) to complete the enclosed certification form. Please read it carefully, complete it, and either sign and return it, or return it to us unsigned with a cover letter of explanation, within 30 days of the date of this letter. Public notice of your request for closure approval, and this request, will be in a newspaper of general circulation in the area of the facility.

Please call **PERMIT SECTION** at 217/782-6762 if you have any questions, or wish to discuss this matter further.

Very truly yours,

Facility has gotten three bids to do the next set of testing. Working on getting a No Further Remediation Letter. Todd Gross at IEPA is the project coordinator.

B. McGowen was not familiar with the CERCLA site investigations and reports that have previously been conducted. B. McGowen is new to his position. He took over from the previous environmental coordinator in May 2009. CERCLIS ID # ILD 984903203-Not on NPL

There are NO solid waste management units at this facility. However,

1. Surface impoundment;

Influent industrial waste water - non-hazardous - is staged in compliance with Sections 402 and/or 307b of the Clean Water Act. The waste water does not meet the definition of solid waste 40 CFR 261.2 or hazardous waste 40 CFR 261.3.

2. Storage Tank (above ground);

Two 6000 gallon diesel fuel (new product) tanks are used for the fueling of diesel locomotives.

3. Storage Tank (underground);

There are 6 underground tanks that were used for product by the previous owners. They have never been used by Chrome Locomotive, Inc. and are empty.

4. Waste Water Treatment Unit;

A pretreatment facility for industrial waste water is permitted, and operated by a certified industrial treatment plant operator, in compliance with 35 Ill. Adm. Code, Part 307, the general pretreatment regulation 40 CFR 403 and Sections 301, 306 and 307 of the Federal Clean Water Act (pretreatment facility permit number 1985-EE2910-1). The facility is excluded from the RCRA permit program under 35 Ill. Adm. Code Section 703.123(f).

5. Waste Recycling Operation;

Waste oils are recovered from diesel locomotives (and the pretreatment facility) and sold to an oil reclaimer.

6. Waste Treatment;

A caustic parts dip tank is neutralized and is exempt from the RCRA permit program under 35 Ill. Adm. Code Section 703.123(f).
